

Graphene K-neighbourhood A': electronic-smearing-only comparison

smearing/degauss (Ry)

- 0 Ry
- 0.0019001 Ry
- 0.0028501 Ry
- 0.0038002 Ry

Same static MLIP short-range $D(q)$ for every curve.
One common EPC reference constant.
No lattice-temperature background.
No per-smearing K re-anchoring.
