

Graphene phonon spectra under diagonal physical-temperature conditions

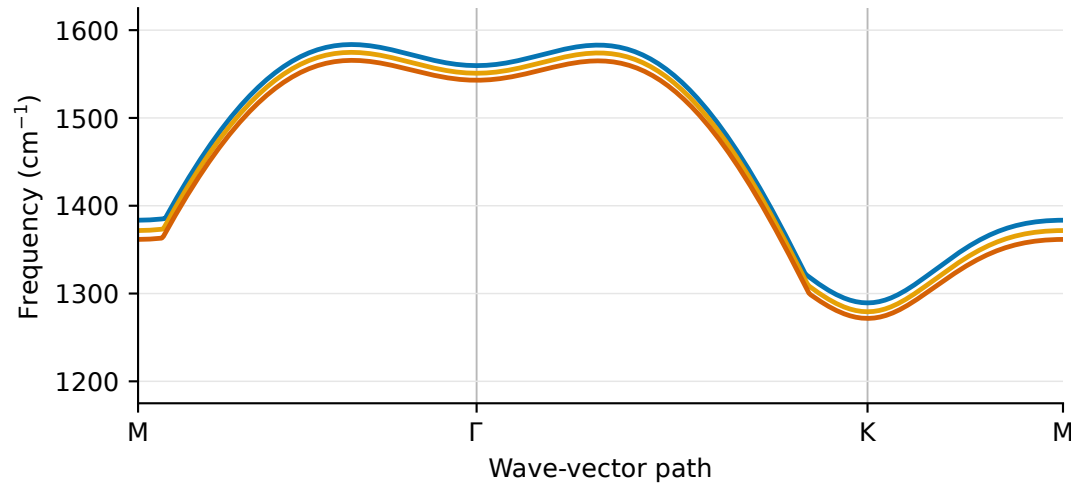

The lattice temperature and the matched electronic smearing operator vary together.

(a) Classical MD/TDEP (L0)

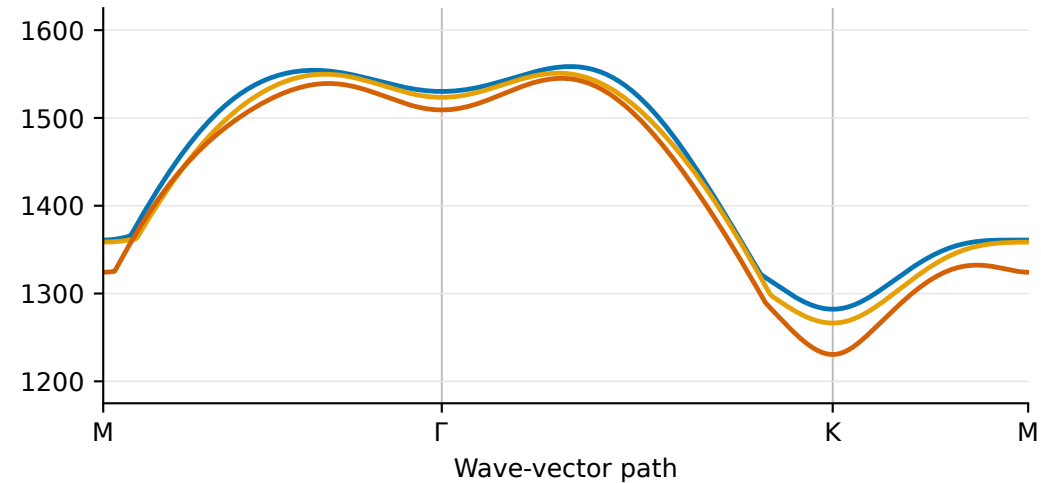

(b) Quantum SSCHA (Q0)

Highest optical branch

Highest optical branch

lattice temperature / smearing/degauss

— 300 K / 0.00190 Ry — 450 K / 0.00285 Ry — 600 K / 0.00380 Ry
